Experience

FEB 2021 - PRESENT

Frontend Web Developer - *FREELANCE*

- Developed several custom websites and web Apps using REACT, SCSS, HTML, CSS, and JavaScript such as the [Ortentic App](#)
- Website Features, design decisions, responsive design, and accessibility for disabled people which is paramount in development as they will increase customer engagement.
- Used React to migrate from a multi-page user experience to a single-page Application e.g my developer portfolio Francis-portfolio.

MONTH 2022 - OCT 2023

Outreachy - *CONTRIBUTOR*

- Was accepted by [Outreachy](#) as an applicant to contribute to Open Source software, Working with several tools like Docker, HTML, CSS, JavaScript, and React. It also built my collaboration skills because I collaborated and worked alongside people from across the Globe.

MONTH 20XX - MONTH 20XX

RCCG, City of David church Abuja - *VOLUNTEER*

- Volunteered to work with the Media and technical team in church, making sure projections and sound during the course of church service runs smoothly.

Profile

I am a creative Frontend web developer, I have a talent for developing elegant solutions that appeal to customers and users, I also tend to have developed a very strong entrepreneurial spirit which drives me always to always be willing to learn new ideas.

Projects

[E-Commerce Application](#)

- Building an e-commerce Application prototype for my Startup idea with React, CSS, MySQL, Strapi Headless CMS, and stripe to enable swift payment. [Github code here](#)

[Meme App](#)

- Customized and built meme app for meme trends in my country, built with React and CSS [Github code here](#)
